Edidi Taiye Olalekan

QA Engineer Candidate | Frontend Developer | AI & Data Annotation

edidi.taiye@gmail.com · 0701 391 2352 · Ikorodu, Lagos, Nigeria · Portfolio · LinkedIn · GitHub

PROFESSIONAL SUMMARY

Computer Science graduate and frontend developer with hands-on experience building and testing React-based web applications, integrating REST APIs, implementing authentication and role-based workflows, and validating responsive user experiences. Also experienced as a data annotator, reviewing and labeling datasets against defined quality and consistency standards to support AI model training. Strong analytical mindset, attention to detail and practical understanding of software development workflows. Seeking to apply this combination of software development and AI/data quality experience in a QA Engineering role.

QA & TECHNICAL SKILLS

QA & Testing	Manual testing · Functional testing · Regression testing · Exploratory testing · Test scenario design · Bug identification & documentation · Web application testing
API & Backend	REST API concepts · API request/response validation · Authentication flows · Error handling · Frontend/API integration
Development	JavaScript (ES6+) · React · HTML · CSS · Sass/SCSS · Tailwind CSS · Component architecture · State management
Tools & Workflow	Git & GitHub · Agile/Scrum workflows · Issue tracking concepts · Responsive cross-device validation
AI / Data Quality	Dataset annotation · Data quality and consistency review · AI training data support · Detailed evaluation and error identification

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | Self-employed / Contract Clients | Nov 2023 – Present · Remote

- Designed, built and tested five web applications using React, JavaScript, Sass and Tailwind CSS, taking projects from requirements and UI implementation through deployment.
- Validated core application workflows including authentication, role-based access, forms, API integrations, responsive behaviour and user-facing error states.
- Integrated third-party APIs and payment gateways, checking request/response behaviour and handling common failure scenarios during development.
- Worked directly with clients to understand requirements, identify issues and deliver functional, responsive software against agreed expectations.
- Built reusable components and maintained application state, developing a practical understanding of how frontend defects can originate from UI, state, API or backend interactions.

Data Annotator | Contract | Nov 2023 – Present · Remote

- Labelled and reviewed datasets against defined quality and consistency standards to support downstream AI model training.
- Identified inconsistencies and quality issues during annotation and review, applying detailed guidelines consistently across assigned data.
- Worked with structured evaluation criteria and maintained accuracy while handling repetitive, detail-sensitive tasks.
- Developed strong attention to detail and analytical review skills directly relevant to AI product validation and quality assurance.

Frontend Developer Volunteer | TOA Foundation | Apr 2021 – Aug 2023 · Lagos, Nigeria

Contributed frontend development skills in a volunteer environment, collaborating on web-focused tasks and applying software development and problem-solving practices.

SELECTED PROJECTS

Gokeke — Ride & Delivery Platform

Technology: React, JavaScript, Sass, Express, MongoDB, REST APIs

Multi-role platform for keke napep ride and delivery services. Built passenger and driver workflows, authentication, dashboards, booking, maps/location features, fare calculation, payment options and negotiation flows. The project provides practical test scenarios across authentication, role-based access, booking, API integration, state management and transaction workflows.

Legal Case Tracker

Technology: React, Sass

Case-management platform for lawyers and clients with dashboards, role-based workflows, real-time messaging and file-sharing features. Provides hands-on experience validating complex multi-user workflows.

E-Commerce Website

Technology: React, Sass

Full-featured storefront with product filtering and payment gateway integration, requiring validation of user flows, product interactions and payment-related behaviour.

Learning Management System

Technology: React, Sass

Interactive LMS supporting course enrollment, quizzes, progress tracking and role-based authentication for admin, student and instructor accounts.

EDUCATION

Higher National Diploma (HND), Computer Science | The Polytechnic, Ibadan | Jan 2019 – Dec 2021

Built a foundation in software development, problem-solving and core computing theory.

CERTIFICATES

- Applied Digital Skills — Google
- Effective Listening — Coursera / LinkedIn Learning
- Teamwork Foundations
- Communication Foundations (2018)

ADDITIONAL

Languages: English, Yoruba
